

TRAIN THE TRAINER

Advanced Manufacturing

Exceptional Training

The MTS Train the Trainer program is designed to prepare instructors with the knowledge and tools to deliver advanced CNC manufacturing training. This course familiarizes the individual with the function, operation, and teaching strategy of CNC technologies using the MTS software. Participants will also be given an “Instructors Package” containing the MTS CNC Manuals.

Course Goals:

- ✓ Hands-On approach to teaching CNC Machining at an industry production level
- ✓ Learn the latest in advanced manufacturing such as on-machine probing routines, high speed machining and parametric programming
- ✓ Learn the latest in CAD/CAM using industry CAD/CAM software to be able to manufacture any part you and your students can imagine

Cost

\$3500 / \$1750
Industry Educators

The cost for the MTS Train the Trainer program is \$3500 for industry and \$1750 for educators. MTS Certificate testing and access to the MTS Software is included for the duration of the course.

Date

8/13 - 8/17

The MTS Train the Trainer program will take place from August 13th, 2018 to August 17th, 2018. The program will feature a mix of classroom learning and hands-on learning in our production CNC machine shop.

Program

Schedule

Monday through Friday
8:00am - 12:00pm - Classroom Learning
12:00pm - 1:00pm - Lunch (provided)
1:00pm - 4:30pm - Hands-On Learning
